Fredrick,

Have they also evaluated whether they can analyze for cyanide in archived tissue samples?

Harry

MOORE Fredrick

Hi All, a little more information to share. I plan on...

Hi All, a little more information to share. I plan on talking with a DEQ toxicologist at 2:00 today and see what we think. Cheers, Fredrick

Fredrick

I thought I'd let you know that I talked to one of the toxicologists at California Animal Health and Food Safety laboratory down in Davis, California (Dr. Robbert Poppenga) about our deer cases near the Dalles, and he thought running a heavy metal screen on the liver of these animals might be worthwhile. He did agree that it might be hard to really make a cause and effect case here, but it could give us a little more information about exposure. I have contacted the OSU diagnostic lab to see if we can get these tissues sent off to Michigan for the screening and save any remaining liver and kidney tissues in case any other animal cases come up.

Hi Dr. Burco,

If you don't mind, could you call the Bend office conference line at 866-680-0146 participant code 648408? I very much appreciate the opportunity to talk tomorrow at 9:00.

Right now, it looks like it's me and my colleague Marcy Kirk. However, this site has garnered a

lot of keen interest from DEQ, EPA and Lockheed Martin and I have passed on your information to them. Would you mind if there were more people to hear what you say?

Cheers, Fredrick
